

New Health Requirements For Students in K5, 7th Grade and 12th Grade

Bethel Christian Academy encourages families to take advantage of the summer days to get their children a yearly physical with their primary care provider in order to review the required immunizations for school.

Students need immunizations when entering Kindergarten and a Tdap and Meningitis immunization for 7th Graders. Beginning the year 2020, students entering the 12th grade or by 17 years of age, whichever comes first, will need another Meningitis booster dose. Note: The booster dose does not apply to individuals who entered the 12th grade before August 1, 2020. Source: [NCDHHS](#)

For questions, parents should contact their primary care provider or the local health department as both know exactly what is needed to get students immunized before school starts on August 24, 2020.

Please ensure all records are submitted to avoid your student being suspended from attendance at BCA.

Get ready for the new school year!

Put vaccines on your child's back-to-school list.
